

Cover Letter

Dear Hiring Manager, I am writing to express my interest in the Data Analyst / AI-related opportunity at your organization. I am currently pursuing a B.Tech in Computer Science Engineering (AI & ML) at Keshava Memorial Institute of Technology and have developed strong skills in data analytics, SQL, Python, Power BI, and AI-based solutions through hands-on projects and continuous learning. I have worked on several practical projects that strengthened my analytical and problem-solving abilities. In my T20 Cricket Data Analytics project, I used Python, Pandas, Web Scraping, and Power BI to analyze player performance and generate data-driven insights. I also developed a Sales Insights Dashboard using SQL and Power BI, where I identified trends and opportunities to improve business revenue. Additionally, I have explored AI-focused projects such as a Signature Verification System using TensorFlow and a Personal AI Assistant with Context Retention. These projects helped me understand how AI and data can be used together to solve real-world problems effectively. I am particularly interested in opportunities that allow me to apply data analysis, business intelligence, and AI technologies to generate meaningful insights and improve decision-making. I am eager to contribute my technical skills, adaptability, and learning mindset while growing professionally within your team. I would welcome the opportunity to discuss how my skills and projects align with your requirements. Thank you for considering my application. I look forward to hearing from you. Sincerely, Malothu Yashwanth
